OFFICE OF SECRETARY TO GOVT OF MYSORE,
INSPECTOR GENERAL OF EDUCATION
EDUCATION DEPARTMENT,
Mysore
Bangalore 7th March 1896

From

H J BHABHA Esq

Secretary to the Govt of Mysore
INSPECTOR GENERAL OF EDUCATION
Education Department

To

The Secretary to the Government of Mysore
in the Revenue and General Departme

Sir

With reference to Resolutions I and II passed at a meeting of the managing Committee of the Mysore Industrial School held on the 10th February 1896 I have the honour to enclose a copy of my memo on the addition of classes for the Sub-overseer Taluk Maistries' and Tank Inspectors certificates to the Mysore Industrial School together with the remarks upon it of the other members of the Committee, and to request that Government will be pleased to accord sanction to the scheme as passed by the Committee and allow the additional classes to be opened in one of the Palace Bangalows in Nazarbad as there is absolutely no room for them in the building in which the school is held

held at- present

3

I have the honour to be,
Sir,
Your most obedient Servant

H J Bhabha
Inspector General.

J R V

Memorandum on the addition of classes for the Sub-overseers Taluk maistries and Tank Inspectors certificates to the Mysore Industrial School by the Inspector General of Education dated the 18th December 1908

---

Matriculation to be the standard of admission to the Sub-overseer Class

The English Lower Secondary Examination to be the standard of admission to the maistries and Tank Inspectors' Class.

3 Sub-overseers are classified into 3 grades ——

| | | |
|---|---|---|
| I Grade | 50 to 70 | No of places 20 |
| II Grade | 35 to 45 | 28 |
| III Grade | 25 to 35 | 20 |

Taluk maistries are paid from Rs20 to 40 Tank Inspectors are paid from Rs1 to 20

The course for the Sub-overseer Class will extend over 18 months commencing from the 1st October ending in April with

next following year but one

6 The course for the maistries and Tank Inspectors' class will extend over 12 months commencing from the 1st June to the end of April in the following year

7 The course for the Sub-overseers' class will be as follows —

| Hours | | Grade |
|---|---|---|
| 2 | Building materials and construction | Intermedia |
| 6 | Building drawing and Estimating | Do |
| 2 | Hydraulics and Irrigation Works | Element |
| 2 | Earthwork and road making | Intermed |
| 2 | Bridge-work | Element |
| 4 | Surveying and Levelling and setting out | Intermed |
| 2 | Mensuration | Do |
| 2 | Practical Geometry | Do. |
| 2 | Carpentry | Element |
| 24 | | |
| 8 | out-door work | |
| 32 | | |

The course for the maistries' and Tank Inspectors' class will be as follows

| Hours | | Grade |
|---|---|---|
| 2 | Earth-work and road making | Element |

2 Building materials and construction - Elementary

6 Building - drawing and Estimating - Intermediate - g

2 Carpentary - - - - Elementary ship

2 Surveying and levelling - - - Do - - s'

4 Outdoor work

---

18

9 - The fee for the Sub-overseers class will be Rs 4

10 - The fee for the masdnes' class will be Rs and 25 students may be admitted to e class — the total fee-income being Rs 15

11 The following additions to the staff of the Industrial School seem to be required

| | Rs |
|---|---|
| A B C E First Assistant on — | 80 |
| Survey Assistant (A Krishna - Swamy Iyer of Arcot Naraimswamy Mudaliars Technical school) | 70 |
| 4 Lascars — — | 20 |
| Contingencies — — — | 40 |
| | Rs 210 |

Apparatus instruments and models and furniture will cost an outlay of about Rs 3000 unless the apparatus belong to the old Engineering College is given, in which case the cost will be reduced

13 - For the encouragement of deserving students from each district one scholarship of the value of Rs 9 for the Sub Overseers' class and one scholarship of Rs 7 for the class of maistries and Tank Inspectors may be awarded by the Deputy Commissioner of each District to deserving candidates of their district possessing the required educational qualifications The scholar-ships should be found from the Local Funds General and the scholars schooling fees will be deducted from their scholarships

After passing through the theoretical course prescribed for Sub-overseers, the student should be required to go through a years' practical course or apprenticeship under an Executive Engineer for a year, a subsistence allowance of Rs 15 being given to them by Government

(Signed) H.G. Khabba
Inspector General of
Education

8

My orignal note on this minute is not forthcomming I beg to submit that I agree with the Inspector General in the main I would only suggest (1) that the standard for admission to the Sub-overseer class be lowered to the Middle school

2 That Hydraulics and applied mechanics be omitted from the course of studies as the Sub-overseer has generally very little to do with Hydraulic formulæ or with stresses and strains I would ubtly the four hours altogether for these subjects for out door work and devote a whole day of 8 hours to it

3 A practical course of setting out may be included under Surveying and Levelling and will be found most useful

4 A B.E. is not likely to remain for any length of time on Rs 80 A passed overseer with practical experience frm the Madras College would be quite ample to teach up to the standar and might be content to remain longer in the appointment

4/12/10 Signed J. Des D'Eru

The course of studies have been well thought out and meet my entire approva-

19/12/95 (Signed) D Sitarama Raw

Do —— I only doubt if a BEe or LCEe or any competent hand can be got on Rs 80 per mensem, unless of course the appointment is made to rest with the Chief Engineer and the man has a prospect of being taken on to the Public works Department

19/12/95 (Signed) RV Sundaram

I think the proposals of the Inspector General of Education will be accepted and a start made with the new year

(Signed) Standish Lee

I submit I quite agree with Mr Bhabha except that I think that he has pitched his standard too high - much higher than for the Madras C E College mastry or Sub-overseers class I would suggest that (1) the Middle school be the standard (2) Upper primary for the mastres and Tank Inspectors (3) 50 Rs is the highest salary for the present for the Sub-overseers and the DPW would have to revise their Code of salaries if 70 is prescribed

I would submit that Hydraulics and Irregation works be omitted from the course Bridge work may be included in construction" Applied mechanics will be quite beyond their reach I would add "Practical measurements of Earth-work and Buildings' and setting out of works

I submit a BE would never stay for Rs 80 A practical overseer who has also passed through the College

1896

19

Engineering will hold to this appointment and be quite competent to teach the prescribed subjects

I know Krishnaswamy Iyer as a Victoria Technical Institute scholar and I think he will do very well

(Signed) I E - D Cruz

From Colonel C Bowen
The Chief Engineer of Mysore, Bangalore

To
The Secretary to the Government of Mysore
General and Revenue Departm

Sir,

With reference to your letter No 11184/354 dated 31st March, forwarding for my opinion letter from the Inspector General of Education in Mysore — & his memo on the subject of opening classes for Sub-Overseers, Taluk masters and Taluk Inspectors in connection with the Industrial School at Mysore, — I have the honor to inform you I received a letter dated 7th February 95 from that officer containing somewhat similar proposals and requesting approval of the course of instruction therein specified I submitted that letter to the Dewan, on the 8th July 95, with a memo containing my own recommendations, but no orders thereon have yet been passed I should like to have back those papers for reference, before I give my opinion on the Inspector Generals more recent communication —

II I do not understand paras 7 & 8 of the Inspector Gs memo, as regards the number of hours for the several subjects as it is not stated whether the hours are per week or other period of days I would like this point elucidated —

III Enclosures are returned

Copy

To

The Secretary to the
Government of Mysore
Revenue and General Departments

Sir

I have the honor to return the original paper regarding the opening of Classes for Lab Overseers, Taluk Surveyors and Bank Inspectors, in connection with the Industrial School at Mysore — forwarded to me with your letter No. 11983 / Fins 1713 dated 23rd Ultimo, for expression of my opinion ——

II —— It seems to me the distribution of time as open to criticism the course for Lab Overseers extends over 18 months and I think each 6 months' term should have different allotment of subjects and of hours instead of same being uniform for the 3 terms For instance, the first term might be altogether confined to (say) drawing and estimating, demonstration practical

practical Geometry, hydraulics (elementary and Surveying with chain and compass the second term to Building materials and Construction Carpentry earthwork and road making tools and simple Engineering Appliances Surveying and setting out. Third term Levelling and Surveying (with a much longer proportion of out-door work than is proposed by Education Secretary), irrigation works bridge work iron work general. Some modification in this direction seems desirable —

III — In para 11 of Education Inspector Generals Memorandum, it is stated that certain additions to the staff are necessary How the present teaching staff is composed I do not know but one of the additions proposed is a B.C.E First Assistant on Rs. 80 I think all the teachers ought to be practical men who have gone through the P.W.D themselves, for some years at least, in the lower Subordinate or Overseers classes, or have been employed on Railways or Municipal works - I need hardly add that good results will mainly depend on the staff, and that fairly liberal

salaries should be given in order to see
thoroughly reliable and experienced in
structors —

I have the honor to be,
Sir,

SUBJECT Returning the papers on connection with the opening classes for Sub Overseers Taluk Inspectors and Tank Inspectors in the Industrial School at Mysore with the Chief Engineers opinion

Subd to Secretary

Attention is invited to the D P W secretary's note dated 8/9/95 which he proposes to combine in recognition of the course of training in the A N M school with the formation of classes in the industrial school mysore. In his note of 0 2 94 Col Meneil Campbell approved of the A N M school proposals and recommended its recognition It is now two years since the classes were opened in the A N M school & if the results are good, it may become superfluous with an efficient institution next door to us, to open a new institution in sept This matter may be left entirely in the hands of the Chief Engineer who may be requested to enquire into the working of the A N M school & whether its practical working justifies the anticipations formed two years ago, and to submit fresh proposals to Govt The proposal of the P W D of Govt involves the taking of a teacher from the A-N M School on 70 Rs & thus shows there is an efficient staff in their school & what with our encouragement in the shape of sending Govt Scholars & the appointments of passed Candidates in our service, coupled perhaps with a small grant aid, the Contonment institution may be made to suit our purposes as a minimum Co

*To*

The Secretary to the Government of Mysore
in the Revenue & General Department
Bangalore

With reference to your docket No 12679/93 403 of 21st May 1896, I have the honour to forward herewith in original docket No 31 of 1 August 1896 with all its enclosures There will be no difficulty in distributing the work of the classes over the period of instruction in the manner suggested by the Chief Engineer. The Chief Engineer's suggestion that (the classes for the instruction of Sub-Overseers, Taluk Masstries and Taluk Inspectors should be placed under a practical man who has himself been in the Public Works Department for some years in the upper subordinate or Executive classes, or has been employed on Railways or Departmental works) is approved of by members of the Managing ~~Industrial~~ School, of the Industrial School

on the terms proposed

of such an instructor may be left to the Chief Engineer himself, and if one who is in the Public Works Department is chosen his services may be lent to the Industrial School, his pay and grade in the Public Works Department be.../ unaffected by the transfer At the same time he might be called Superintendent of the Industrial School, the present Superintendent being called Assistant Superintendent With these remarks I submit my memorandum of the 18th December 1895 again for orders

2 When the School is removed to the house in which the Mysore Executive Engineers office is at present held, there will be plenty of room for the additional Classes

3 I request all the enclosures may be kindly returned when they are done with

I have the honour to be,
Sir,
Your most obedient servant,

H. J. Bhabha

~~The~~ Chief Engineer of Mysore

Bangalore

To

The Secretary to the

Government of Mysore

General & Revenue departments

SIR

In returning the original letter from the Inspector General of Education with its enclosures, received with your No. 2591/Ed 102 of 21st instant, I have the honor to inform you that, if I am to understand that the salary of the Superintendent of the Engineering branch of the Industrial School is to be Rs. 80/- only, I regret there is no officer or subordinate in the department having the needful theoretical and practical knowledge to whom that salary would be an inducement to take up the post ——

— I would recommend that advertisements be published, offering the appointment to a retired Subordinate of the Public Works department, though I fear the offer, on such a salary, is likely to be treated with derision by really competent men. A good all round man

man is wanted to ensure success, and
to such an Engineer the salary is not
likely to be acceptable If good Enquir=
=ers could be thrown in possibly candi=
=dates might come forward The only
hope is in retired Public works man.—

I have the honor to be,
Sir,
Your most obedient Servant.

J W Willey Colonel
for Chief Engineer of Mysore

Bangalore
26th August

*From*

H J BHABHA Esq

*Inspector General of Education in Mysore,*

*To*

The Secretary to the Government of Mysore
in the General & Revenue Depts,
Bangalore

SIR,

With reference to your memo No 333/Ed 12:
dated the 5th September 1896 and its enclos
I have the honour to inform you that th
Committee of the Industrial School are
of opinion, and I agree with them, tha
of Sub Overseers Classes are opened
in the Industrial School, some Of
ficer holding at least the rank of
an Assistant Engineer should be ap
pointed Superintendent of the School
his pay being fixed at a figure di
rectly between Rs 200 and 300 a mo
with due reference to his substantiv
pay and his travelling and other
allowances, so that he may not su
fer in his emoluments while se
ving in the Industrial School He

His rank and promotion in the list of D P W Officers should in no way suffer by the transference of his services temporarily to the Industrial School. It is for the Government to decide whether under these circumstances the Superintendent's pay should be disbursed from the Local Funds General or the D P W Budget As the Superintendent will be engaged in the education of Sub-overseers, Taluk Maistries and Taluk Inspectors who will be employed in the D P W, his pay will not perhaps be an unfair charge upon the D P W funds When an Engineer is appointed Superintendent the present Superintendent may be styled Assistant Superintendent and he will remain in charge of the industries taught at present but will be subordinate to the Superintendent

I have the honour to be,
Sir,
Your most obedient servant,

H J Bhabha
Inspector General

CENTRAL OFFICE,

Bangalore 12- March 1897

*From*

*The Chief Engineer of Mysore*
*Bangalore*

*To*

The Secretary
to the Govt of Mysore
General & Revenue Department

SIR,

In reply to your letter No. 71
Ed 72.
of the 4th instant forwarding for my
opinion letter No. 2065/143 of 7th September 18
from the Inspector General of Educat
on Mysore, regarding the opening of
Engineering classes in the Mysore
Industrial School, and enquiring
if I would support the scheme in
general and help to carry it out
by furnishing the necessary staff
I have the honor to state that though
I cannot spare at present any suitab
and competent Assistant Engine
from my establishment I have
already recommended that the
time of Superintendent required
will probably be found by adjustm

the post on a liberal salary and that a selected P W Subordinate will be the best

II The employment on Mysore P W D of "passed men" should not be guaranteed — on the contrary, but the School may be considered as a source of supply according to requirements and the attainments of the Students

III I demur to the establishment charges being debited in whole or in part to the P W Budget The institution as I understand an educational one, and its cost is therefore an educational charge, pure and simple

IV Enclosures are returned

I have the honor to be
Sir
Your most obedient Servant

C Vincent Colonel

Chief Engineer
of Mysore

(1) The following correspondence ending with letter No 1144 dated 11th March 1897 from the Chief Engineer of Mysore giving his opinion on the scheme

Letter No 2053 dated Bangalore 9th May 1896 from the Chief Engineer of Mysore

I have the honor to return the original papers regarding the opening of classes for Sub Overseers Taluk Maistries and Tank Inspectors in connection with the Industrial School at Mysore, forwarded to me with your letter No 11983—Mis 1713 dated 23rd ultimo for expression of my opinion

II It seems to me the distribution of time is open to criticism The course for Sub Overseers extends over 18 months and I think each 6 months term should have a different allotment of subjects and of hours instead of same being uniform for the three terms For instance the first term might be altogether confined to(say)Drawing and Estimating Mensuration Practical Geometry,Hydraulics(Elementary) and Surveying with chain and compass The second term to Building Materials and Construction Carpentry Earthwork and Road making Tools and Simple Engineering Appliances Surveying and Setting out The third term Levelling and Surveying (with a much longer proportion of out door work than is proposed by Education Secretary) Irrigation Works Bridge Work Iron Work General Some modification in this direction seems desirable

III In para 11 of Education Inspector General's Memorandum it is stated that certain additions to the staff are necessary How the present teaching staff is composed I do not know but one of the additions proposed is a B C E First Assistant on Rs 80 I think all the teachers ought to be practical men who have gone through the Public Works Department themselves for some years at least in the Upper subordinate or Executive classes or have been employed on Railways or Municipal Works I need hardly add that good results will mainly depend on the staff and that fairly liberal salaries should be given in order to secure thoroughly reliable and experienced instructors

---

Letter No 1947—93 dated 11th August 1896 from the Inspector General of Education

With reference to your docket No 12679—Ed 403 of 21st May 1896 I have the honor to forward herewith in original docket No 31 of 1st August 1896 with all its enclosures There will be no difficulty in distributing the work of the classes over the period of instruction in the manner suggested by the Chief Engineer The Chief Engineer's suggestion that the classes for the instruction of Sub-Overseers Taluk Maistries and Tank Inspectors should be placed under a practical man who has himself been on the Public Works Department for some years in the Upper subordinate or Executive classes or has been employed on Railways or Municipal Works is approved of by all members of the Managing Committee of the Industrial School The choice of such an Instructor may be left to the Chief Engineer himself and if one who is in the Public Works Department is chosen his services may be lent to the Industrial School his pay and grade in the Public Works Department being unaffected by the transfer At the same time he might be called Superintendent of the Industrial School the present Superintendent being called Assistant Superintendent With these remarks I submit my memorandum of the 18th December 1895 again for orders

2 When the school is removed to the house in which the Mysore Executive Engineer's Office is at present held there will be plenty of room for the additional classes

3 I request all the enclosures may be kindly returned when they are done with

Letter No 31 dated 30th July 1896 from the Honorary Secretary Industrial School Mysore, to the Inspector General of Education in Mysore

I have the honor to submit the accompanying papers relating to the proposed establishment of the Sub Overseers and Maistries classes The members are almost unanimously of opinion that the selection of the Engineer to be in charge of the School should be left to the Chief Engineer

The members also agree to adopt the system of sessional work mentioned by the Chief Engineer

The question remaining to be settled is whether the Public Works Department or the Industrial School budget should meet the salary of the Engineer that may be appointed If this matter be speedily settled by Government the classes may be started

I think it is taken for granted that the Engineer appointed would take charge of the whole institution including the present Industrial classes

Letter No 4489 dated Bangalore 26th August 1896 from the Chief Engineer of Mysore

In returning the original letter from the Inspector General of Education with its enclosures received with your No 2591—Ed 102 of 21st instant I have the honor to inform you that if I am to understand that the salary of the Superintendent of the Engineering Branch of the Industrial School is to be Rs 80 only I regret there is no officer or subordinate in the department having the needful theoretical and practical knowledge to whom that salary would be an inducement to take up the post

2 I would recommend that advertisements be published offering the appointment to a retired subordinate of the Public Works Department though I fear the offer on such a salary is likely to be treated with derision by really competent men A good all round man is wanted to ensure success and to such an Engineer the salary is not likely to be acceptable If good free quarters could be thrown in possibly candidates might come forward The only hope is in retired Public Works men

Letter No 2065—143 dated Mysore 7th September 1896 from the Inspector General of Education in Mysore

With reference to your Memo No. 3335—Ed 1[illegible] dated the 5th September 1896 and its enclosure I have the honor to inform you that the Committee of the Industrial School are of opinion and I agree with them that if Sub Overseers' classes are opened in the Industrial School some Public Works Department officer holding at least the rank of an Assistant Engineer should be [illegible]

OFFICE OF INSPECTOR GENERAL OF EDUCATION IN MYSORE

~~Bangalore~~ 18th August 1898

From

H J BHABHA, Esq,

*Inspector General of Education in Mysore*

To

The Secretary to the Government of Mysore
in the General and Revenue Depts.
Bangalore

SIR

With reference to your Docket No 1476 Ed 7 22-96 dated the 27th July 1898, I have the honour to inform you that there is absolutely no room in the present building of the Mysore Industrial School for the accommodation of Engineering classes, and that therefore the opening of the classes may be deferred until the school is removed to a more spacious building.

2 The Committee of the school at a meeting held on the 4th June 1898 fully discussed the subject of Government Order No 8757-9, Educational 7 22-96 dated 28th January 1898 and were of opinion that

HD

as the Industrial School has made satisfactory progress in all its departments under the present Superintendent it would under the present altered circumstances of the school be more fair to him if he should be allowed to retain his present designation of Superintendent, and he and the Head Master of the Engineering Classes paid an equal salary of Rs 150 The subject requires further consideration After a qualified Engineers serv
the pay he would accept is ascertained, I shall submit to Government a modified scale for sanction

3 For the two reasons given above I have deferred the submission of the proposition statement called for in your docket under reply

I have the honour to be,
Sir,
Your most obedient servant,

H.B. Khabha
Inspector General.

H.S.

Read -

Letter No 1600/50 dated 18 August 1898 from the Insp Genl of Forests in Mysore explaining why that the submission of a detailed proposition statement called for Govt pro No 8757-9 E&F 22-96 dated 28th January 1898 for opening Engineering Classes in the Mysore Industrial school has been delayed for the following reasons

(1) That the accommodation in the present Industrial school buildings is insufficient

(2) That a modified scheme for employing Head masters on Rs 150/- is under the consideration of the Committee of the Industrial school for further consideration -

SECTION Ed 91
FILE No 22
PP 9

Order thereon No 3481-82 E&F 22-9 dated 12-9-98

The Govt ordered & conveyed their pro No 8757-9 E&F 22-96 dated 28th Jan 1898 which was passed after due deliberation and consideration of the whole correspondence which took place on the subject Govt approved of

Col Bowers suggestion to employ as Superintendent, a well paced Public Works Subordinate A modification of the orders already passed seems undesirable The delay in the submission of the Proportion Statement to called for in the proceeded above, is very much to be regretted The Insp-Gl is requested to consult the present Chief Engineer and to place himself in communication with the Secretary to expedite the submission of the Estimates already called for

2 The question of additional accommodation will be disposed of when the scheme for opening Engineering classes is finally sanctioned

No 3545/137 Encls 1 — OFFICE OF INSPECTOR GENERAL OF EDUCATION IN MYSORE

Mysore ~~Bangalore~~ 2nd November 1898

From

H J BHABHA ESQ,

*Inspector General of Education in Mysore*

To

The Secretary to the Government of Mysore in the General and Revenue Depts, Bangalore

SIR

5.33 With reference to Order No 348/Ed 7 dated the 12th September 1898, I have honour to inform you that I placed myself in communication with Mr O Norris of the Public Works Department now in charge of the French Rocks Division through the Chief Engineer Mr Norris who seems to be the only qualified man available for teaching the Engineering classes states that he will have to sever his connection with the Public Works Department completely and forfeit all claim to pension if he accepts the Superintendentship

it not clear why should give up connection with PW Dept if he is an Asst Engr on 300/- and give up 1/3 pension ??

as of the Industrial School 50 and asks for a
pay of Rs 300 At the same time he
has not the special qualifications in
free-hand drawing, modelling, tile
and pottery works which the present
Superintendent possesses Mr Morris
is willing however to have charge of
the Engineering classes only on Rs 200
a month

2 In continuation of my letter
No $\frac{1600}{50}$ dated 18th August 1898, I beg (S No
to forward herewith copy of the Pro-
ceedings of a meeting of the Committee
of the Mysore Industrial School held
on the 4th June 1898 The proceedings
will show the progress made by the
school under the present Superintendent
The correspondence relating to the
establishment of the Engineering
classes commenced with my letter No
5499-239 dated 7th March 1896
Since the date of that letter the Mysore
Industrial School has expanded and
improved considerably, so that the
undivided attention of the Superintendent
is necessarily required for the eight
departments now existing.

3 Under ~~these~~ 5IX circumstances I submit that the Engineering class may be organised as a separate school on the lines already approved by the Chief Engineer and that it may be placed under the Headmastership of Mr. Norris or some other equally qualified Engineer of experience on Rs 200 a month, the Industrial School being left under the present Superintendent as at present The question of promoting the present Superintendent may be deferred for future consideration As soon as Government approve of the establishment of a separate Engineering school I shall submit a Proposition statement of its establishment

I have the honour to be,
Sir,
Your most obedient servant
H J Bhabha
Director General.

Proceedings of a meeting of the Committee of Mysore Industrial School held on the 4th June 1898 at 8 A M

Present –

Mr H J Bhabha
Mr J Weir
Mr M V Srinivasachargar Provisional Secretary

The correspondence relating to the appointment of a retired officer from the D S W as Superintendent and the formation of a special branch for classes for the training of Sub Overseers, Taluk Masstries and Taluk Inspectors was considered The Committee also fully considered the special training of the present Superintendent at the Madras School of Arts the certificates he had obtained there and the work he has done as Superintendent since his appointment to the Mysore Industrial School

The Committee resolved that

I A representation be made to Government to the effect that as the Industrial School made satisfactory progress in all departments under the present Superintendent, it would under the present altered circumstances of the school be more fair to the present Superintendent that he should

retain his rank as Superintendent The
Committee recommend that Mr M V Srinivasengar's pay be raised to Rs 150 a month
and that an Engineer Assistant who
should be one that has retired from the
S P W from the grade of Assistant Engineers
be appointed on Rs 150 to be in direct charge
of the Engineering classes proposed to be
opened The proposal will not increase the
cost of establishment beyond the present
sanctioned scale of expenditure

II

That Mr Norris be written to and asked if
he will accept the post of Engineer Assistant
on Rs 150 should Government sanction
it

III

That the consideration of the proposals for
the necessary mem l establishment
instruments and apparatus required for
the Engineering classes be deferred to the
next meeting of the Committee

(Signed) H J Bhabha
President

dy 2/12/98

Ed 722-96

The Inspector General
of Education

6914 dy 2nd ~~Nov~~ Dec 98

Ed 722-96

His letter No 3545 dy 137
2nd Nov 1898 recommending that the Engineering classes opened at the Industrial School Mysore, may be ~~organized~~ under the Head mastership of Mr Norris or some other Equally Qualified Engineer ~~of Experience~~ on Rs 200/- a month and that the ~~sections of the said Industrial~~ School ~~at Mysore~~ may be placed under the present Supt

Has the honor to observe that the proposal to have two highly paid Officials for the Industrial School without a General Supt does not ~~commend itself~~ seem desirable to Govt

Govt approved of Col Bowie's Suggestions

to place the Industrial School under the General Superintendence of any Officer of the PWD, and ~~to~~ a Officer of the status and qualifications of an Asst Engr was considered necessary for the important charge of the ~~Industrial~~ School

It is not clear why Mr Norris should give up his connection with the PWD in which he is an Asst Engr on Rs 300/- per mensem & give up his claims to pension. The Inspector General is however requested to submit information on the following points

1) What is the present status and pay of Mr Norris and the length of his service

2) Whether he is eligible for retirement, if so what pension would he be entitled to ?

No 4821
169

Dated 8th December 1898

Received

Enclosure No (one)

Subject

Submitting the information called for as regards the status pay & service of Mr O V Norris & explaining that the Engineering School should be separable from the Industrial School

Submitted
KCG
14.12.98

Cabd to Secy

Mr Norris seems to wish to retire from the P W Deptt and then join the Educ Deptt There will be difficulty in returning him as he is not superannuated, has only 16 years reasonable service, and his appointment is not gazetted

He is 52 yrs old

If leave should be necessary there is nothing to prevent his being transferred provided the Retd Allowances are reduced, pay at his own request

Dated the 14th

The whole question connected with the Educational Service is under consideration and Rules are being framed for the constitution of the Service, the pay of the various appointments, the conditions of leave &c &c

Mr Norris's case will be considered when the Rules are framed

I have the Honor to be,
Sir,

OFFICE OF INSPECTOR GENERAL OF EDUCATION IN MYSORE

No 4821/169 Encl 1 Mysore/Bangalore/ 8th December 1898

From

H J BHABHA Esq.,

*Inspector General of Education in Mysore*

To

The Secretary to the Government of Mysore
in the General and Revenue Department/
Bangalore/

SIR

With reference to your Docket No 6914/7 In A Ed 22-5 of 2nd December 1898, I have the honour to inform you that I feel convinced that unless the Industrial and Engineering Schools are treated as separate institutions and placed each under a qualified man, neither institution is likely to be a success. I am not aware that Col Bowen was in favour of placing both institutions under an officer of the Public Works Department. In any case I do not know that I had any personal knowledge of the work [illegible] Technical School

61

under reply I enclose copy of docket No 943 dated 7th December 1898 from Mr O V Norris Executive Engineer French Rocks Division, which gives the information required by Government Mr Norris desires to take up the work of the Engineering School at considerable sacrifice of income, as for personal and family reasons the work of a teacher seems to suit him better than the duties of an Executive Engineer who has to travel for the greater part of the month in his district It seems to me that he has only to ask for permission of his departmental superiors to join the Educational Department, and his pension will be determined by the pay he gets during the last five years of service before retirement

I have the honour to be,
Sir,
Your most obedient servant,
H Bhabha
Inspector General.

Enclosure No

I In reply to Inspector General of Education's No 4737/1287 of 5th December 1878, have the honor to furnish the following information -

(1) Substantive appointment with Assistant Engineer 1st grade Rs Pay Rs 300/-
Now officiating as Executive Engineer in charge of French Rocks Division on Rs 380/- with Rs 5/- per day travelling allowances when on tour.

(2) Length of Service in Mysore State 16 years 3 months of which only 15 years count for Pension

Not eligible for retirement excepting under Section 296 clause (b) of Imperial Service Regulations

II The undersigned has applied to the Chief Engineer in this office No 474 Dated 16-11-98 for one years furlough pending final orders on his transfer to the Educational Department from which he was originally transferred to the Public Works Department

To

The Inspector General of Education
in Mysore

Sir,

With reference to your letter No. 24
of the 14th September last, enquiring if
O V Norris, Assistant Engineer of this
Department will be permitted to take up
post of Head Master of the Engineering
Classes to be opened in the Mysore Indu
School, &c, I have the honour to anne
extracts of Paras 1 and 2 of his letter
473 of the 16th ultimo on the subject
and to inform you that, if the Educatio
Department accepts the terms on whic
Mr. Norris is prepared to take up the
post of Headmaster, application will b
made for the sanction of Government
to his transfer to the Education Depart
ment, in which case he will sever hi
connection with the P W Department (
has been made aware of this condition
as the exigencies of this Department
to admit of his services being

II I have at the same time to inform you that Mr. Morris has just been granted one year's furlough.

To
The Superintending Engineer,
Western Circle

Sir, With reference to the Supdtg Engineers No. 3472 of 27th September 1898 giving cover to Chief Engineer's No. 5425 of 22-9-98 and Mr. Khabba's No. 2412/28 of 14-9-98, I have the honour to reply that I am prepared to accept the post of Headmaster of the Engineering Classes (to be opened in connection with the Mysore Industrial School) on a salary of Rs 200/- per mensem, provided I am placed in independent charge of the Engineering School apart from the rest of the Technical Institution.

2 The delay in sending up this reply has been unavoidable as I was only recently informed that it is now proposed to keep separate the posts of Headmaster of the Engineering School and Superintendent of the Industrial School and not amalgamate them, as one might conclude from No. 2412/28 of the Inspector General of Education.
